

TALLADIUM MILLABLE PRODUCTS

Talladium offers multiple sizes and material for your milling needs. Our yttria-stabilized zirconia is manufactured using the highest quality powder offering remarkable translucency. The zirconia are isostatically cold pressed and partially sintered, producing a premium quality fit available for single units and up to 14-unit frameworks with no distortion.

Our **PMMA discs** are an extremely valuable tool for your lab to manufacture top quality temporaries and try-ins. Our discs are also formulated from a special blend of polymers that burn out cleanly making them perfect for the lost wax technique.

Talladium also offers **Wax discs** specially formulated in-house by our experienced technicians. When machined, the copings and frameworks are smoothly cut away leaving exceptional accuracy. Call Talladium for more information.
